

Facilities Expansion – March 2021

We have recently taken over the factory adjacent to our existing factory and converted this into a Warehouse for the receiving of raw materials, storage and distribution of finished goods.

Director Dona Baxter noted

“Our existing factory also served as a warehouse for raw materials and stock and space was at a premium, particularly with the addition of our shoe cover manufacturing machines mid 2020. Establishing a dedicated warehouse allows for better controls of raw materials and stocks and significantly improves efficiencies in dispatch/collections”

Lindy Njoki has been appointed as Factory & Warehouse Administrator
