

## **Manufacturing of Mob Caps In South Africa**

It's been a journey but manufacturing of Mob Caps is underway in South Africa. After many years of being subjected to imports, primarily from China, South Africa now has its own Mob Cap manufacturing facility, based in Robertville (near Roodepoort), Johannesburg. And furthermore the fabric is provided by local manufacturers whose own raw materials that go into making the fabric (non-woven spun bond polypropylene) are sourced locally.

The end product is of superb quality, comfortable and caters for the vast array of African hairstyles and head sizes with all the primary colours used in south (and globally) catered for. Mob Caps are sold in boxes of 1000 units packed and sealed in bags of 100.

The objective of "We R Mob Caps" is not only to sell into the local South African market but also to enter into the export market with a strong focus on the SADC region.

The manufacturing facility, based in Johannesburg, has been built from the ground up with the sole purpose of producing mob caps using the latest technology available.
